California Statistical Abstract

State of California
Pete Wilson, Governor

Sacramento, California
Issued November, 1996

PREFACE

This is the 37th edition of the California Statistical Abstract, a compilation of data on social, economic and physical aspects of the State. The volume is a cooperative effort of various government agencies, coordinated and issued annually by the California Department of Finance, Financial and Economic Research Unit.

The contributor for each table is given at the bottom of the table and may be contacted for more details or an explanation of the data. The Department of Finance welcomes comments on the Abstract and ways in which it may be developed into an even more useful compilation of data on the State.

Note: *Because of conflicting release schedules, the “public finance” tables in Section P have been dropped beginning with this issue. These tables are now included in the **Economic Report of the Governor**.*

INTRODUCTION

California covers 163,707 square miles between the 32nd and 42nd parallels north latitude on the Pacific coast. There are 840 miles of general coastline. The State is well known for its temperate climate which has attracted millions of people to the coastal cities. Los Angeles-Riverside-Orange ranks as the second largest consolidated metropolitan area in the United States, and San Francisco-Oakland- San Jose as the fourth. California includes Mount Whitney, the highest peak in the contiguous United States, 14,494 feet above sea level, and Death Valley, 282 feet below sea level, the lowest point in the Western Hemisphere. The average July maximum temperature ranges from 62 degrees in Eureka to 106 in Imperial County.

Population—During the century following 1860, California's population approximately doubled five times or once each 20 years. However, with such a burgeoning base count, this rate could not be sustained. During the 10 year period since 1985, the net annual civilian migration has varied from a high in 1990 of 434,000 to a low of -61,000 in 1993. From July 1, 1985 to July 1, 1995, the total population increased by 5,660,000 or 21.4 percent.

Labor force and employment—California's civilian labor force averaged 15,416,000 for 1995, a loss of 46,000 or -0.3 percent, from 1994. Civilian employment increased by 73,000 to 14,206,000 while unemployment decreased by 119,000 to 1,210,000. The resulting unemployment rate dropped to 7.8 percent from the 8.6 percent rate in 1994.

Gross state product—California's gross state product for 1992 was \$787.9 billion, 13.1 percent of the U.S. total.

Personal income—Personal income of California residents reached \$760 billion in 1995, 12.5 percent of total U.S. personal income.

About 55 percent of the total was received as wages and salaries. Together, services and manufacturing accounted for over 40 percent of the total wage and salary disbursements.

Corporate income—Net income less net loss of \$33.1 billion was reported by the 414,203 banks and corporations operating in the State during the 1994 income year. Manufacturing industries accounted for approximately one third of the total net income.

Manufacturing—California has the largest manufacturing complex in the Nation. According to the 1992 Annual Survey of Manufacturers, value added during that year amounted to \$155 billion. The state's aerospace industry remains the largest in the U.S. and claimed 16.8 percent of all defense prime contracts in fiscal year 1995, in addition to substantial production for the civilian sector.

Agriculture—California continues to be the nation's leading agricultural producer. Cash receipts from marketings received by California farmers during 1994 totaled \$20.1 billion.

Metropolitan areas—As of January 1, 1993, California gained two Metropolitan Statistical Areas (MSA's), bringing the total to 25. Out of the 25, 12 are designated as Primary Metropolitan Statistical Areas (PMSA's) by virtue of being grouped into one of the state's three Consolidated Metropolitan Statistical Areas (CMSA's). The tables on the following page list the counties in each designated area both before and after the 1993 changes.

Counties—There are 58 counties in California. Much of the data in the Abstract are reported by county. For the user's convenience, a map is provided as well as a listing of California cities and their corresponding counties.

SECTION B

POPULATION

The tables in this section summarize available data on the population of the State of California, its counties and cities. Comparisons of California's population with the totals for the Nation are also shown.

All figures on the total population of California for 1940 through 1969 are from publications of the United States Bureau of the Census. All estimates of the civilian population and estimates of the total population for the state and counties after 1969 were prepared by the Department of Finance and are based on the analysis of components of population change. Data used in the preparation of these estimates have been obtained from the Vital

Statistics Section, Department of Health; Department of Education; the Immigration and Naturalization Service; and United States Department of Defense; the Department of Motor Vehicles; and the United States Bureau of the Census.

In addition to the preceding data sources, the estimates for cities also use information supplied by the cities in California and their respective utility companies.

Also included in this section are selected data on population by race and age from the 1990 Census of Population.

a/ Employers not engaged in an exempt activity and who have one or more persons in their employ and pay wages in excess of \$100 during a calendar quarter are subject to Code. Exempt employment includes interstate railroads; self-employed; some Federal, State and local government; and some domestic workers in private homes. Exempt workers may be insured under the Code if the employer elects coverage.

b/ Due to changes in reporting methods made by the Bureau of Labor Statistics, data collected prior to 1992 are not entirely comparable to current data.

a/ Because of the implementation of a different rounding convention, historical data may differ with data in previous issues.

b/ Employment reported by place of work. Does not include farmers or unpaid family workers.

c/ Includes employees not identifiable by county.

d/ Beginning in 1994, the Fresno MSA includes Fresno and Madera counties and the Sacramento MSA excludes Yolo county.

However, employment data for these MSAs have been reconstructed back to 1988.

e/ Beginning in 1992, agricultural employment data for Inyo and Mono counties are reported separately.

e/ Incidence rates represent the number of nonfatal injuries and illnesses per 100 full-time employees and were calculated as $N \times 200,000 / (EH)$ where N = number of occupational injuries, illnesses, or lost workdays; EH = total hours worked by all employees during 1993; and $200,000$ = 100 full-time equivalent workers (40 hours per week, 50 weeks per year).

b/ Excludes farms with fewer than 11 employees.

SECTION D

GROSS STATE PRODUCT, INCOME AND COST-OF-LIVING

This section presents data on Gross State Product, business and personal income and the Consumer Price Index.

Gross state product estimates are prepared by the U.S. Department of Commerce, Bureau of Economic Analysis on an industry or gross product originating basis, and are shown in both current and constant dollars.

Estimates of personal income received by residents of each state are prepared annually by the Regional Economics Information System, Bureau of Economic Analysis, United States Department of Commerce.

Median income data and poverty statistics are from the 1990 Census of Population, conducted by the U.S. Department of Commerce, Bureau of the Census, and represent 1989 income.

Data on business and personal taxable income are compiled by the California Franchise Tax Board's Statistical Systems Bureau. It should be noted that much of the state's personal income is received by persons who had insufficient amounts of gross income and net income to necessitate their filing State returns or who are exempt from State taxation. Conversely, there are items of taxable income which are not included in the personal

income concept, such as gains from the sale of assets.

Therefore, the data reported on California personal income tax returns are not strictly comparable to those estimates of total personal income reported by the Department of Commerce.

The Consumer Price Index is published for three areas in California, the Los Angeles-Anaheim-Riverside CMSA (Los Angeles, Orange, Riverside, San Bernardino, and Ventura Counties), the San Francisco-Oakland-San Jose CMSA (Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, and Sonoma Counties), and the San Diego MSA (San Diego County). The index is also published for California and the United States.

The indexes for the United States, San Diego, San Francisco-Oakland-San Jose, and Los Angeles-Anaheim-Riverside are compiled by the United States Bureau of Labor Statistics. The index for California is computed by the California Department of Industrial Relations, Division of Labor Statistics and Research, as a weighted average of the Los Angeles-Anaheim-Riverside, San Francisco-Oakland-San Jose, and from 1965-1986, San Diego indexes.

a/ Includes returns received through approximately the end of December of the succeeding year. Table D-9 is derived from all current year returns before audit. Table D-8 is based on a random stratified sample prepared by the Economic and Statistical Research Bureau of the Franchise Tax Board. Because of the different data sources, tables D-8 and D-9 are strictly not comparable.

b/ For resident returns AGI represents California AGI, while for nonresident returns AGI represents total AGI.

a/ The U.S. Bureau of Labor Statistics rebased all CPI indices from 1967 to 1982-84 starting with the release of data for January 1988. Historical data were also converted to the new base to facilitate comparisons over time. While the index numbers are different, the percentage changes should be comparable.

b/ Computed by the Department of Industrial Relations, Division of Labor Statistics and Research as a weighted average of the indices for Los Angeles-Anaheim-Riverside, San Francisco-Oakland-San Jose and, from 1965-86, San Diego.

a/ Deaths shown above may not agree with deaths shown in vital statistics tables because some diseases are not listed separately in the International Classification of Diseases List of Causes of Death on which the vital statistics tables are based, or because the definitions of some of the diseases used in the International List differ from the definitions used for morbidity purposes.

b/ Non-A, Non-B is a new category added in 1982 by the Center for Disease Control, Atlanta, Georgia.

c/ Chickenpox deaths 3; Herpes zoster deaths in the elderly or otherwise seriously ill people 26.

d/ All deaths due to the late effects of polio.

e/ Seven due to late effects of rheumatic fever, 2 due to acute rheumatic fever for 1980.

f/ Respiratory infections not included after 1988. After May 1989, cases reported only in foodhandlers, dairy workers and outbreaks.

g/ Prior subcategories combined for reporting beginning with 1993.

h/ Does not include Chlamydia, NGU or RID.

i/ Also includes congenital, early latent, late and late latent syphilis.

n/r No longer reportable.

a/ Employers with substantial employment in multiple counties or industrial classifications are counted as a reporting unit in each county or industrial classification. An employer with only one business location and activity is counted as one reporting unit.

b/ As of the first quarter of 1987, approximately 80,000 active employers but with zero employment and wages, and not reported as out-of-business, were included as counted reporting units.

c/ A drop occurred in average reporting units for 1989. This is due to a purge of the employers reporting zero employment and no payroll for four consecutive quarters.

d/ The increase in average reporting units for 1991 is the result of the new Business Establishment List (BEL) reporting system. The definition of "multiple establishment employers" has been changed, causing more employment sites to be counted as reporting units.

e/ Due to changes in reporting methods made by the Bureau of Labor Statistics, data collected prior to 1992 are not entirely comparable to current data.

SECTION F

EDUCATION

This section summarizes data relating to libraries, and to public and private education in California, both at the elementary and high school levels (kindergarten through grade 12) and at the collegiate levels (community colleges and universities or State colleges). The California State Department of Education has responsibility for accumulating and reporting data on public and

private school activities for kindergarten through grade 12. The State Department of Finance and California Postsecondary Education Commission have responsibility for higher education statistics.

The source of library statistics is the California State Library.

a/ Includes materials, salaries, operation, contract services, transfers and payments. Excludes capital outlay and transfer to reserves.

b/ Expenditure for staff salaries and benefits. Included in total operating expenditures.

c/ Expenditure for all library materials: books, periodicals, microforms, audiovisual materials. Excludes supplies, binding and materials leased on contract. Included in total operating expenditures.

d/ Total number of persons employed, professional and support, expressed in full-time equivalent (FTE). Full-time is normally 40 hours per week but not less than 36.

e/ Total count of volumes held at end of fiscal year, June 30.

f/ Total annual out-of-building circulation, all materials, all units.

g/ Number of items borrowed by reporting library on interlibrary loan from other libraries. Includes photocopies sent in lieu of interlibrary loans.

h/ Number of items lent by reporting library on interlibrary loan (ILL) to other libraries. Includes photocopies sent in lieu of interlibrary loans.

i/ Annual total of questions answered by reporting library: questions, readers assistance, bibliographies, research projects, data base searches. Includes activities requiring use of library collections and services and/or training and experience of staff, but not simple directional questions.

j/ Includes State and Federal libraries.

k/ All county law library figures are considerably underreported as only about 1/2 of these libraries submit reports to the State Library.

l/ Less than 500.

NOTE: This list of 102 dams includes those of at least 190 feet in height or at least 100,000 acre feet of reservoir capacity. There are more than 1,200 dams within the safety jurisdiction of the State, which is exercised over dams which are 25 feet high or more storing more than 15 acre-feet of water, or which are more than six feet high sloping at least 50 acre-feet. Federally operated dams, 27 of which are listed here, are exempt from State safety supervision. The 'height' listed is the vertical distance from the crest of the dam to the original streambed at the downstream toe of the dam.

a/ Value added to gross income. Value added to net farm income equals difference in net farm income and returns to operators.

b/ Includes landlord capital consumption.

c/ Statistics in and above the net farm income line represents the farm sector, defined as including farm operators' dwellings located on farms. Statistics below the net farm income line represents only the farm businesses to the exclusion of the operators' dwellings.

d/ Excludes landlord capital consumption.

SECTION H

MANUFACTURING

This section presents data on manufacturing industries summarized from the U.S. Census of Manufactures and the Annual Survey of Manufactures conducted by the U.S. Bureau of the Census. Detailed information for individual industries and local areas are also available in the published reports of the Bureau of the Census. Data on manufacturing reporting units by county and by number of employees are compiled from reports published by the Employment Development

Department.

Information shown on California's defense-aerospace manufacturing sector is obtained from reports of the U.S. Department of Defense (DOD), the National Aeronautics and Space Administration (NASA), and the California Employment Development Department. Material from these and other sources has been summarized by the Department of Finance.

a/ Implementation in 1991 of the new Business Establishment List (BEL) reporting system caused changes in the size categories from 1990 to 1991. The definition of "multiple establishment employers" has been changed, causing more employment sites to be counted as reporting units, and also increasing the numbers of reporting units in the smaller size categories.

b/ Establishments reporting employment covered by unemployment insurance during the third quarter (July-September) of each year.

SECTION I

CONSTRUCTION

This section presents annual data on California building permits issued for housing units, and the valuation of building permits issued for both residential and nonresidential units. Annual figures by county are also included. The sources of construction statistics are Security Pacific National

Bank (through 1986) and the Construction Industry Research Board. The data on housing characteristics are provided by the U.S. Bureau of the Census and the Department of Finance. The California Association of Realtors is the source for the existing home sales price data.

SECTION J

TRANSPORTATION AND PUBLIC UTILITIES

This section presents selected transportation statistics and data summarizing the operations of public utilities.

The statistical data relating to highway transportation provide information on mileage, fuel distribution, construction and maintenance mileage, vehicle registrations, licensed drivers, and accidents.

Additional travel related information may be obtained from "Travel and Related Factors in California", published annually by the Department of Transportation, Office of Traffic Improvement.

In addition, this section contains California's electrical energy generation and representative utility bills for selected cities.

a/ Privately owned utilities calculated using appropriate Baseline allowance for each utility and zone. Bills are based on total effective rates including balancing account adjustment factors and CPUC Reimbursement Fee.

b/ Served by two gas utilities: b1/--PG&E, b2/--Southern California Gas. c/ Publicly owned utility.

d/ Data relate to an exchange with the same name as the city listed. Exchange boundaries may exclude parts of the city and include parts of other areas. The rates shown do not reflect the following surcharges in effect on 1/1/1996: 2.544% basic billing surcredit (except Long Beach, 0.93% surcredit), 0.36% surcharge to fund communications devices for the deaf/disabled, 0.1% surcharge to fund CPUC, 0.27% surcharge to fund California High Cost Fund and 3.2% surcharge to fund Universal Lifeline Telephone Service. The rates shown do not reflect the interstate access monthly charges of \$3.50 per residential or single-line business line and \$4.67 per multi-line business line (\$6.00 per multi-line business line in Long Beach). The rates shown do not reflect miscellaneous local, state and federal taxes.

e/ Figures in parentheses indicate usage allowance. f/ North District Area g/ Expanded local calling area.

SECTION L

BANKING AND FINANCE

This section presents bank and savings and loan association statistics. The bank statistics were supplied by the Federal Deposit Insurance Corporation. The savings and loan statistics were obtained from the Aggregate Thrift Financial Report prepared by the Office of Thrift Supervision. Additional data may be obtained

from these sources.

In addition, a new Economic Census on California's financial, insurance and real estate industries is presented. This census report is issued by the U.S. Department of Commerce, Bureau of the Census.

SECTION O

ELECTIONS

Information relating to registrations and voting is presented in this section. In the interest of space, the data are limited to registrations by principal political parties, the total vote cast, and a statement of the vote for major candidates at the November 1990 and 1992 General Elections. A complete accounting of registrations, the vote for all

candidates (including representatives in Congress, State senators, assemblymen and judicial officers) and the vote cast for and against all ballot propositions is given by the Secretary of State in Statement of Vote, a booklet issued after each primary and general election.

SECTION P

COMPARATIVE ECONOMIC DATA FOR THE STATES

Economic, social, and demographic comparisons are featured in this section. The Department of Finance, Financial and Economic Research Unit, compiled the tables using data supplied by various sources. Major data sources include: U.S. Department of Commerce, Bureau of the Census

and Bureau of Economic Analysis; U.S. Department of Labor, Bureau of Labor Statistics; Department of Defense; Department of Agriculture; National Education Association, and the Federal Bureau of Investigation.

Note:

Because of conflicting release schedules, we have dropped the "public finance" tables beginning with this issue. These tables are now included in the Economic Report of the Governor.
